EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>
Regular updates will be posted as they are available.

Comments: I live on the Animas River in Aztec, New Mexico and have been directly affected by the toxic release of waste from the Gold King Mine. My water well is 200 feet from the river, and I fear long term effects due to the free flowing nature of this river. Myself and 9 other residences in this immediate area have access to a Municipal water System that terminates approximately 1200 feet from my residence. We would like immediate assistance to hook up to this Municipal System to help alleviate the immediate detriment the EPA spill has caused. I would appreciate a prompt response concerning this matter, since, as I write this I cannot use my Well, and have not been able to for the last 6 days.
